This listing of claims will replace all prior versions, and listings, of claims in the application:

## Listing of Claims:

Claims 1-10. (canceled)

- 11. (currently amended) A liquid dishwashing detergent composition suitable for use in hand dishwashing, the composition comprising:
  - (a) an anionic surfactant;
  - (b) a solvent;
  - (c) an amine having a pKa of greater than 8.0; and
  - (d) a perfume composition comprising from about 45% to about 100-65% by weight of an odor neutralizer which is capable of forming a Schiff base when reacted with the amine;

wherein the detergent composition has a pH of from about 8.5 to about 12.

- 12. (previously presented) The liquid dishwashing detergent composition according to Claim 11, wherein the perfume composition comprises from about 0.1% to about 4% of a fragrance material having a boiling point of less than 180°C.
- 13. (previously presented) The liquid dishwashing detergent composition according to Claim 11, wherein the perfume composition comprises from about 30% to about 50% of a fragrance material having a boiling point of between 180°C and 260°C.
- 14. (previously presented) The liquid dishwashing detergent composition according to Claim 11, wherein the perfume composition comprises from about 20% to about 70% of a fragrance material having a ClogP value of greater than 2.5.
- 15. (previously presented) The liquid dishwashing detergent composition according to Claim 11, wherein the perfume composition comprises less than 20% of a fragrance material having an odor detection threshold of less than 4.0 mg/L in a solution of fragrance material and water.

- 16. (previously presented) The liquid dishwashing detergent composition according to Claim
- 11, wherein the detergent composition comprises less than 0.5% of hydrogen peroxide.

Claims 17-20. (canceled)

- 21. (previously presented) The liquid dishwashing detergent composition according to claim 11, wherein the detergent composition comprises from about 0.01% to about 0.5% by weight of the perfume composition.
- (previously presented) The liquid dishwashing detergent composition according to claim 11, wherein the detergent composition further comprises a diamine.
- 23. (previously presented) The liquid dishwashing detergent composition according to claim 22, wherein the detergent composition comprises from about 0.1% to about 15% by weight of the diamine.
- 24. (previously presented) The liquid dishwashing detergent composition according to claim 22, wherein the anionic surfactant and diamine are in a mole ratio greater than about 9:1.
- (previously presented) The liquid dishwashing detergent composition according to claim 22, wherein the detergent composition further comprises an amphoteric surfactant.
- 26. (previously presented) The liquid dishwashing detergent composition according to claim 25, wherein the detergent composition comprises from about 0.1% to about 20% by weight of the amphotoric surfactant.

- 27. (previously presented) The liquid dishwashing detergent composition according to claim 22, wherein the anionic surfactant, amphoteric surfactant and diamine are in a mole ratio from about 100:40:1 to about 9:0.5:1.
- 28. (currently amended) A liquid dishwashing detergent composition comprising:
  - (a) an anionic surfactant;
  - (b) a solvent;
  - (c) an amine having a pKa of greater than 8.0; and
  - (d) a perfume composition comprising from about 30 45% to about 100 65% of an odor neutralizer which is capable of forming a Schiff base when reacted with the amine, wherein the perfume composition comprises a volatile fragrance material having a boiling point less than 160°C;

wherein the detergent composition has a pH of from about 8.5 to about 12.

- 29. (previously presented) The liquid dishwashing detergent composition according to claim 28, wherein the perfume composition comprises from about 0.1% to about 4% by weight of the volatile fragrance material.
- 30. (previously presented) The liquid dishwashing detergent composition according to claim 28, wherein the perfume composition further comprises a volatile fragrance material having a boiling point from 180°C to 260°C.
- 31. (previously presented) The liquid dishwashing detergent composition according to claim 30, wherein the perfume composition comprises from about 30% to about 50% by weight of the volatile fragrance material having a boiling point from 180°C to 260°C.
- (currently amended) A detergent composition comprising:
- (a) from about 0.1% to about 5% by weight of a diamine having a molecular weight less than or equal to 400 g/mol;
  - (b) from about 5% to about 50% by weight of an anionic surfactant;
  - (c) from about 0.5% to about 10% by weight of an amphoteric surfactant;
  - (d) from about 0.1% to about 10% by weight of a buffering agent;
  - (c) from about 0.1% to about 1.5% by weight of an alkali metal inorganic salt;

- from about 0.75% to about 25% by weigh of a solvent; and (f)
- from about from about 0.01% to about 0.5% by weight of a perfume composition (g) comprising from about  $30\,45\%$  to about  $100\,65\%$  by weight of an odor neutralizer capable of forming a Schiff base with the diamine.
